

## Press Release

Verum Software Technologies

September 29, 2011

Waalre, The Netherlands

### And the Winners are ...

*The winners of Verum's ASD:Suite Contest have been selected. The contest, which kicked off in April, gave software engineers in Europe full access to Verum's newest ASD:Suite. The challenge was to use the imagination together with the ASD:Suite to build a practical and illustrative application of any kind, for any device.*

Ten winners have been selected as either "very cool" or "highly efficient". The most impressive, innovative, illustrative and outright cool applications for publication were selected in the Coolness category. Efficiency in development is measured by a specific set of ASD metrics, selecting the winners for the Efficiency category.

Each of the top ten winners will receive an Apple iPad2 during a special award ceremony held at the ASD user event on Tuesday October 4, we hope all winners will be present during the iPad party.

#### Top Winners for Coolness:

Hans Kuppens	Winner	spASDinvaders <i>Probably the best known and most played game of all times completely rebuild with the ASD:Suite</i>
Filip Stachowiak	Runner-up	Traffic crossing
Ivana Todosijevic	1	Self service shopping
Nenad Terzic	2	CNC control
Jelena Baluban	3	Vacuum cleaner

#### Top Winners for Efficiency:

Martin Keesen	Winner	On Board Unit <i>A sophisticated on board unit for vehicle tracking and emergency communication and assistance, build with the ASD:Suite</i>
Terry Dennemans	Runner-up	I2C implementation for home automation
Willie Aarnink	1	Tweet/Re-tweet app
Danilo Bojovic	2	Light and Shades control
Milica Topic	3	Elevator

The contest has inspired a lot of excitement and creativity within the Verum Community, many of whom have requested detailed descriptions of the winning apps. These will be published in the upcoming months.

### ***About the ASD:Suite***

Making software design verification a reality

The Verum ASD:Suite is a unique, general purpose, software design automation platform. Incorporating fully automated mathematical verification technology, it enables software engineers to build better, more complex software while delivering a net 30%-50% improvement in productivity and a corresponding decrease in time to market.

ASD:Suite users include Ericsson, FEI Company, PANalytical, Philips, Nspyre, Sioux, and TASS.
